

PACKAGE SIZES:

Art.-No. 372.222
10l canister

KLEEN ambiente 25 is an extremely effective care and protection of stainless steel surfaces as well as objects made from chromium, aluminium and anodized surfaces. KLEEN ambiente 25 is non-oil based and prevents fast resoilage and avoids visible finger prints

- acidic basic cleaner and care product
- high performing product to use for removal of lime scale, corrosion stains, urine deposits and any other deposits on acid-resistant surfaces, pool areas, sanitary areas and kitchen areas
- based on phosphoric acid with integrated corrosion inhibitor
- not suitable for acid-sensitive surface such as toilet lids, enamel, marble and other calcareous material
- free of hydrochloride acids

APPLICATION RANGE:

Recommended application concentration: 1 - 3% for normal removal of water hardness, 10 % for acidic base cleaning. Especially suitable for basic cleaning all acid proof materials in wet areas/wet cells. Powerful cleaner for final cleaning after building constructions, removing cement residues and deposits on stainless steel surfaces.

Not applicable on acid sensitive surfaces.

INSTRUCTIONS FOR USE AND DOSAGE:

For removal of strong lime deposits and urine stone. KLEEN ambiente 25 may be used for basic cleaning - and for daily intermediary cleaning - such in pool areas with higher degree of water hardness. Always prewater surfaces well before cleaning! **Basic cleaning:** Concentrated or 1:10 diluted (800 ml on 8 l water) on surfaces. Allow to penetrate for several minutes. Repeat if necessary. **Intermediary cleaning:** Dilute 1:50 (160 ml on 8 l water) - 1:100 (80 ml on 8 l water). After cleaning - add plenty of fresh water onto surface to remove remains - thus avoiding damage on surfaces from remains of acidic agents.

Prior to use - always test on a small area.

Always follow the instructions of suppliers of sanitary installations.

If improperly applied - and for claims resulting from such improper handling - there will be no legal claims accepted.

TECHNICAL DATA:

Form: clear, red liquid
 Odour: fresh, slightly stinging
 Viscosity: low
 Density: 1160 g/L
 pH-value in delivery state: 1

INGREDIENTS:

Below 5 %: non-ionic surfactants
 Contains: perfumes, ALPHA-ISOMETHYL IONONE
 Giscode: GS 80
 Stability: at least one year in original containers
 The surfactants contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents

LABELLING:

 Danger	<p>Contains Phosphoric acid.</p> <p>Hazard statements: H314: Causes severe skin burns and eye damage.</p> <p>Precautionary statements: P102: Keep out of reach of children. P280: Wear protective gloves/eye protection. P301+330+331: IF SWALLOWED: rinse mouth. Do NOT induce vomiting. P303+361+353: IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water. P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a POISON CENTER or doctor.</p>
